. . . so, I thought I'd update it to the latest version and now it doesn't work . . . I had to put the CD in the drive to get a fresh 1.60 patch but now I can't play the game . . . When I put the CD in I can choose my save from the old build and it works fine but when I go to play the game, I click play, it loads up the menu and as soon as it starts loading my save, I get an error message stating that my save is corrupt . . . This is really annoying and it's pretty much ruined the game. Any ideas? A: There are two options here, I believe: 1) Patch the game This will go back to the old game from the CD and you can play the game without having to install the patched version. 2) Reinstall the game This will give you the updated game, and the ability to patch it on your own. Personally, I'd recommend this. The main problem, I think, is that your save file is corrupted. This is probably because the file is an old file. It's not clear what version of the game you're using, but I believe that once you patch it, it changes your save file to the version 1.60, which has the improved features. You can fix it using a patch. It's not easy to do, but the instructions are on the patcher site. 1. Field of the Invention The present invention relates to a physical quantity sensor for detecting a physical quantity such as acceleration, angular velocity, and magnetic force, and also relates to a control device for performing control by using the output signal of this sensor. 2. Description of the Related Art In the past, as an acceleration sensor, a piezoelectric device utilizing a piezoelectric material has been known, as disclosed in Japanese Patent Laid-Open No. 10-271308 (1998). In this acceleration sensor, a rod-like piezoelectric material is used, and stress is generated in the piezoelectric material when a force is applied to the piezoelectric material. As a result, a potential difference occurs between opposite end surfaces of the piezoelectric material. In this way, the acceleration sensor is configured by, for example, a PZT piezoelect 82157476af
