-pro.html L3top: Do I need to do something specific? It says it could not configure a complete installation Oh. Do you have enough space on the disk for that to work? L3top: Yes, I have 6GB triple check that... I am convinced the path is bad. can you run gksudo nautilus from the terminal and then hit ctrl+L L3top: That did not work either triple check that. !paste For posting multi-line texts into the channel, please use | To post!screenshots use |!pastebinit to paste directly from command line | Make sure you give us the URL for your paste - see also the channel topic. L3top: Ok, I found a way. I moved the folder to its own partition. and it doesn't matter if its correct? L3top: Not sure why it was complaining about the path, I found the path in the installer. I don't think it matters. hi Well it matters... its important. The path is what is giving you the issue. triple check that it is correct. L3top: Ok, it opened the new file. How do I test it? No need... sudo grub-install --recheck /dev/sda1 should be sufficient. I would like to see a screenshot of this screen. L3top: I am getting an error, "The program 'grub-install' is currently not installed. You can install it by typing: sudo apt-get install grub-pc". L3top: I am sorry, I thought it was a 82157476af
